

AIRPLANE SAFETY

1985 - 2014

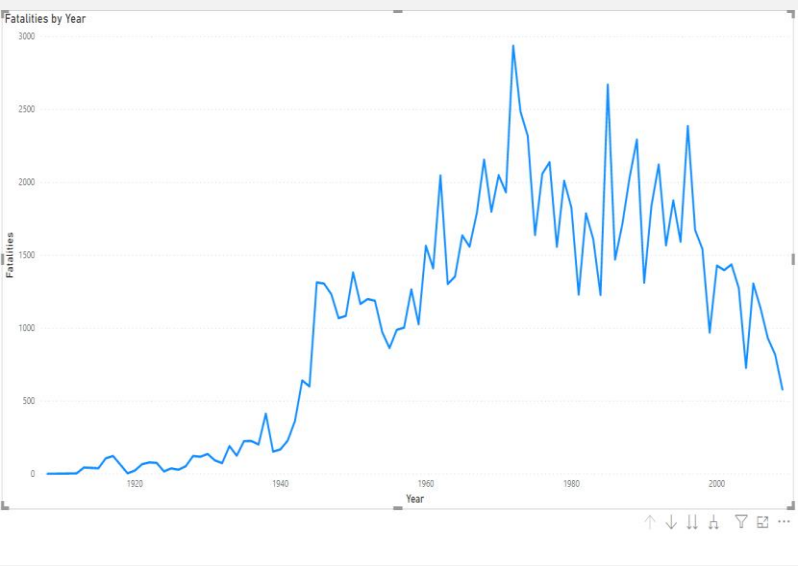

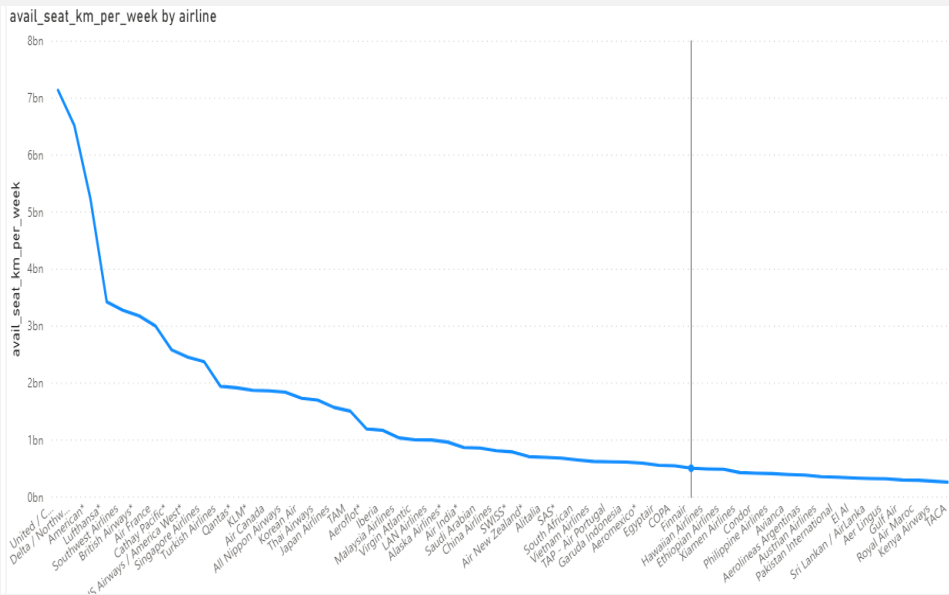

The above bar chart displays fatalities and the below pie chart is great for displaying percentages / parts of a whole.

The chart to the right shows which airlines have the most incidents and fatal accidents. As you see, Aeroflot has the most covering 46% of the chart.

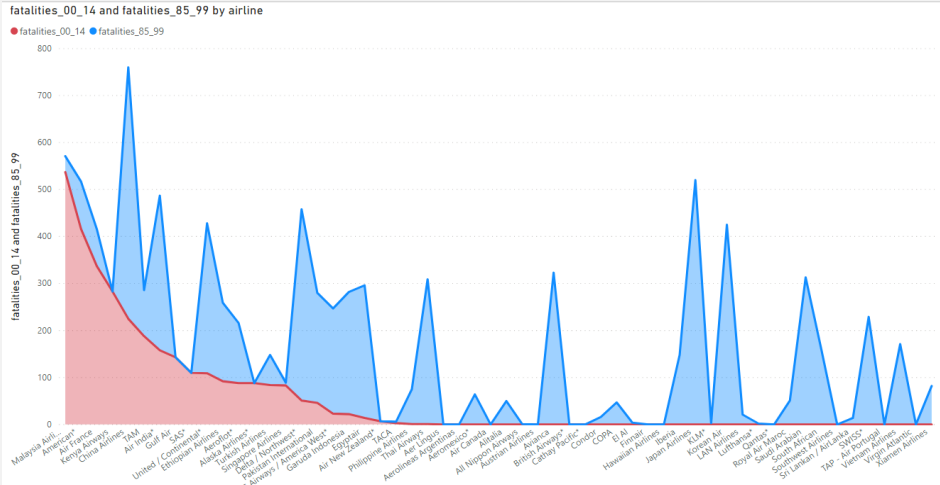

The line charts below show the available seats in the airline per week and the 2937 fatalities in 1972

The doughnut chart shows which airline has the most fatalities, while the stacked bar chart to the right shows fatalities per airline.

Five Airlines with most Incidents & Fatal Accidents

Aeroflot* Delta / Northwest* American* United / Continental* Ethiopian Airlines

The TreeMap below shows which airlines have higher fatalities.

The TreeMap on the right shows us which airline has the highest fatality rate, with China Airlines, Malaysia Airlines, Japan Airlines, and American Airlines having the highest fatality rates.

Conclusion: Reading through all the charts, it is prevalent that China Airlines is the most unsafe airline, having higher fatality rates than any other airline, and TAP airlines is the safest having a low fatality/incident rate, only having one. The next safest airline is Virginian Atlantic, Hawaiian Airlines, and Finnair.
